

Professor Stephen Jolles

Dr Jolles is a Consultant Clinical Immunologist and Honorary Professor at the University Hospital of Wales. He is Clinical Lead in the Immunodeficiency Centre of Wales and Co-Director of the Hub Immunology Diagnostic Laboratory of Wales. Dr Jolles trained in immunology and allergy, and obtained his PhD on Langerhans cell migration at the National Institute for Medical Research, London. He has a particular interest in the clinical use of immunoglobulin and its mechanism of action and research interests include development of new therapeutic products, new screening strategies to improve the laboratory diagnosis of primary and secondary immunodeficiency and allergy, and better ways to monitor primary and secondary immunodeficiency disease and the impact of treatments.
